

ENVIRONMENTAL IMPACT REPORTS (CEQA/NEPA)

LILBURN
CORPORATION

In California, any proposed land development or public works project will likely require evaluation of the proposal's potential environmental effects. Lilburn Corporation's experience with governmental regulations and permitting processes provides strategic insight to addressing environmental concerns. We coordinate and facilitate the approval of projects to meet the maximum objectives possible. Our clients include state and local agencies and land owners/developers. We are proud that over 70 percent of our work is repeat or referral business.

CEQA and NEPA compliance, Surface Mining

and Reclamation Act, Federal Endangered Species Act, California Endangered Species Act, and waste disposal and air quality permitting are our primary areas of expertise. We provide biological resource surveys and monitoring, preparation of habitat conservation plans, and coordination of consultations and authorizations with federal and state agencies.
