

MINING AND RECLAMATION

LILBURN
CORPORATION

Permitting of new and existing mines has become a complex and difficult aspect of the mineral resources industry. Lilburn Corporation specializes in permitting the most difficult and controversial mines with success. A strategic approach to identifying and resolving permit requirements is applied from preparation of application packages through project approval.

Reclamation planning and design is Lilburn Corporation's primary area of service to the mining industry. We are leaders in mine reclamation planning with proven experience at hundreds of mines throughout the western United States. We bring experience and creativity to solving operating and reclamation challenges with sensitivity to both the environment and the industry.

Mine inspections are an annual responsibility of SMARA lead agencies. Lilburn Corporation has designed and implemented inspection plans for several SMARA lead agencies in California. We regularly inspect mines for compliance with Federal, state, and local conditions of operation, reclamation and mitigation. Our experience and opinion is respected by both industry and agencies as proven and our performance as accurate. We have prepared and reviewed financial assurances for numerous mines throughout the State.

- TXI/Riverside Cement
- Unocal/Molycorp, Inc.
- U.S. Gypsum Company
- Western Aggregates

Mineral resource assessments are compiled in support of due diligence and feasibility analyses for the purchase and permitting of potential mine sites. Lilburn Corporation has prepared assessments for clients interested in the acquisition of existing mines as well as a part of the due diligence for acquisition and permitting of new mine sites.

Mineral title research is often required to insure clear title and to identify any covenants, restrictions, or conditions that can be vital to vesting and mineral rights issues. With the assistance of knowledgeable title companies, Lilburn Corporation has completed title searches as part of the mine acquisition process.
